

March Math Newsletter

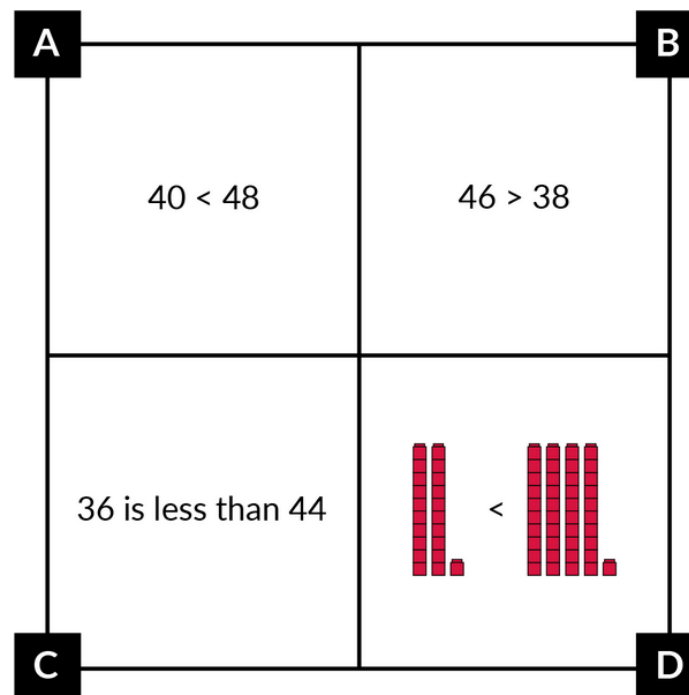

Grades K-1

Take time with your family to talk and reason about math.

Scavenger Hunt (Find, Make, or Draw..)

1 3 cylinders 	2 $3 + 2$ objects 	3 The number 15 	4 Something lighter than you
5 Something shorter than you 	6 Something heavy 	7 Something taller than you 	8 4 rectangles 
9 The number 20 	10 5 cubes 	11 2 circles 	12 Something longer than your foot
13 A set of 10 	14 Something heavier than you 	15 4 triangles 	16 10 and 6 more objects
17 3 squares 	18 Something shorter than your leg 	19 The number 12 	20 $10 - 8$ objects

Look at this set of four pictures. Decide which one doesn't belong with the other three. Use math words to describe your thinking. There are many ways to think about each one!

Challenge

Find reasons why *each* of the pictures might not belong with the other three.

Share

Explain your thinking to someone else. Do they have different reasons why one doesn't belong?

Flip over to see if your thinking matched ours **AND** to get links to interactive math games to play with your family at home.

Possible thinking/reasoning for the activities on the front

- A doesn't belong because it's the only one where both numbers start with 4. The other ones compare numbers with different numbers of tens.
- B doesn't belong because it's the only one that shows greater than. All the others show less than. It's the only one that doesn't say the first number is less than the other number.
- C doesn't belong because it's the only one that uses words to compare instead of a $<$ or $>$ symbol.
- D doesn't belong because it's the only one that uses cubes instead of numbers. It's the only one that compares numbers with the same ones digit (1). It's the only one that compares two odd numbers. It's the only one where the difference between the numbers is more than 10.

Interactive Math Games
